New Plasterboard law

With effect from 1st April 2009 the Environment Agency has banned the disposal of plasterboard and other sulphate bearing products at landfill sites.

Customers, suppliers, carriers and producers of plasterboard and plaster are now advised to separate their waste prior to final disposal.

To ensure you and your business are compliant with this change in law, **Commercial Recycling** can offer licensed disposal facilities at convenient sites within Dorset & Somerset (details below)

Plasterboard Disposal facilities

Canford Recycling Centre
