

Loose
& Bagged
ex Canford

CANFORD SOIL & SANDS

AMS (Avon Material Supplies) are **LEADING SUPPLIERS** of recycled and primary aggregates throughout Dorset, Hampshire, Wiltshire, Somerset and Devon.

As part of this, we **MANUFACTURE AND SUPPLY** an array of different soil and sand products.

LOOSE LOADS

Our soil and sands are available in loose loads which can be collected directly from AMS at Canford Recycling Centre.

To see our full range of aggregates visit:
www.avonmaterialsupplies.co.uk

BULK BAGS

Bulk bagged soil and sands are also available but must be pre-ordered if being collected. Deliveries throughout Poole, Bournemouth and surrounding areas can be arranged by calling **01202 810935**.

WHERE TO COLLECT FROM?

Canford Recycling Centre
Arena Way, Off Magna Road
Wimborne
Dorset
BH21 3BW

or visit www.avonmaterialsupplies.co.uk

SHARP WASHED SAND (GRIT)

This coarse, washed and graded sand is 5mm in size. It is typically purchased by businesses, construction sites and individuals. Sharp washed sand is perfectly suited to be used for **FLOOR SCREEDS, BLOCK PAVING** and mixed with other size aggregates to make concreting ballast. Produced in accordance with the Environment Agency's WRAP protocol, our sharp washed sand is classified as a recycled aggregate and meets the British Specification for this material.

MEDIUM WASHED SAND (WASHED SAND)

A finer alternative to sharp washed sand, medium washed sand is also graded but smaller at approximately 2mm in size. Also classified as a recycled product and produced in accordance with the Environment Agency's WRAP protocol, our medium washed sand is produced by the aggregate washing plant and is the go-to product often selected for **GENERAL SAND FILL**.

WASHED SAND SUITABLE FOR CATTLE BEDDING

This fine washed sand is used extensively on farms throughout the South West and Southern England countryside. At around 2mm in size, it is a first-rate manufactured sand that is ideal for animal bedding as it **REDUCES DUST, STORES LESS BACTERIA AND OFFERS GREATER COMFORT**. An added 'after use' benefit of this sand is it can be spread on wet areas, as the sand helps to improve ground conditions.

WASHED SAND SUITABLE FOR CABLE LAYING

When laying cables this is the ultimate sand to use. Frequently purchased by businesses and construction sites and tested for conductivity properties, this washed recycled sand that is relatively fine at 2mm is a great choice to ensure that **CABLES ARE LAID PROPERLY AND SECURELY**.

For deliveries please call: 01202 579579

or email: enquiries@avonmaterialsupplies.co.uk

WASHED SAND SUITABLE FOR EQUESTRIAN USE

This sand is a firm favourite of horse lovers across Dorset and Somerset. Produced by the aggregate washing plant, this recycled product is an **IDEAL AND CHEAPER ALTERNATIVE TO SILICA SAND** and is used by equestrian centres on their ménages. Soft under hoof with good drainage properties, this washed sand makes for a perfect riding surface.

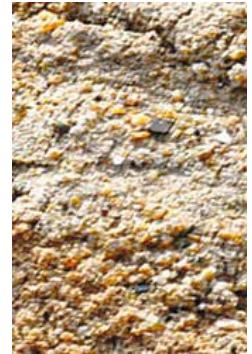

SCREENED BUILDING SAND

Our screened building sand is yellow in colour, and is produced by dry screening imported as dug sand over 5mm wire screens. Suitable for various aspects of construction such as **BRICKLAYING, POINTING AND BLOCKWORK**, screened building sand is popular with builders in the Poole and Bournemouth area. Regularly tested, this sand meets the British Standards Specification for this product. Test certificates available.

AS DUG SAND (FILLING SAND)

As dug, or filling sand, is produced at the Canford site by screening imported sand over our 20mm 'Warrior' screener. This screening process is vital to ensure that any unacceptable large lumps of clay or dry screened sand are removed. This sand product is suitable for a bulk filling product or used for **GENERAL FILL AND IS ALSO SUITABLE FOR BLINDING** on oversite material before concreting.

10MM MANUFACTURED SOIL

A much used product manufactured in accordance with the Environment Agencies position statement for quality top soil. Regularly tested by internal and external specialists to ensure the high quality standards remain. Principal applications for this soil includes; **TURF LAYING, GENERAL LANDSCAPING, FILLING FLOWER BEDS AND SOWING GRASS SAND.**

For collections please visit: Canford Recycling Centre
Arena Way, Off Magna Road, Wimborne. BH21 3BW

SAMPLING AND TESTING OF OUR SAND & SOIL PRODUCTS

Independent testing of all products is regularly carried out and is available on request. Samples of any of our products can be provided for your inspection within a few days of request.
