

Quality and Environmental Policy Statement	Policy No – 318	
	Date Modified: 2nd November 2011	

All Commercial Company facilities are operated in line with this Policy Statement.

Commercial Recycling Ltd is committed to setting high standards of waste management and co-operating with all regulatory authorities in ensuring safe and environmentally acceptable working practices for all its activities. We aim to manage and reduce any negative impacts of our business on the environment, including prevention of pollution.

All services are designed to meet current market conditions, requirements of regulatory authorities and to have minimal impact upon the environment and our neighbours. The Company Policy is to comply with the spirit as well as the letter of environmental legislation co-operating fully and maintaining open relationships with all regulatory authorities. The Management System will support the Company in doing this and is a key element in ensuring regulatory compliance, customer satisfaction and improved customer service.

Commercial Recycling Ltd are committed to continually improve its environmental performance and the services and products it provides to customers. The Company has established customer and legislative requirements and assesses the environmental effects of its operations and policies with a view to preventing pollution and reducing environmental impact. Where quality and environmental aspects are deemed significant a programme of Objectives and Targets will be set and continually reviewed to aid continual improvement.

Through ongoing education and communication the Company ensures that management, technical and operational personnel are fully conversant with the Company's objectives.

The implementation and maintenance of the Management System will be the responsibility of all staff. They must ensure that the staff under their jurisdiction are familiar with the requirements of the Management System and that they have access to and are fully conversant with applicable procedures.

The Directors are committed to and have assumed responsibility for quality and environmental management within the Company, and are responsible for co-ordinating and monitoring the effectiveness of the system through internal audits and analysis of data both of which will form the basis of process and systems improvement.

Waste Solutions

We employ a wide range of waste management and resource utilisation services. To ensure that materials handled by Commercial Recycling Ltd are recovered/recycled, treated, packaged, transported, and disposed of in an environmentally acceptable manner,

Standards

Standards have been put in place to ensure we operate, as a minimum, to the relevant laws, regulations and appropriate codes of practice. Our facilities are managed to protect the environment and public health.

Sustainability

Promote sustainable waste management, through the provision of a diverse range of waste management solutions, including, waste minimisation, recovery and recycling. Work to conserve non-renewable resources and promote renewable fuel alternatives.

Monitoring and Reporting

Monitor, measure and report on environmental performance in all key areas. Set targets for the improvement of performance.

Independent Scrutiny

Commercial Recycling Ltd will provide information in suitable and accessible forms. Welcome visitors to our facilities. Undertake appropriate dialog and education on environmental issues, with all relevant bodies and stakeholders.

Policy Development

Continually develop our policies, knowledge and update our procedures in line with best practice within the waste management in the UK. Support and promote research. This Policy will be reviewed regularly by the management team, commitment to this Policy is important for the development and future success of Commercial Recycling Ltd.
